

## Dysphagia is hard. Drinking water shouldn't be.

Dysphagia doesn't just change how you swallow—it changes how you move through your day. Hydration becomes hard work. The Provale Cup gives you back what should have always been simple: the ability to take a drink without an audience, without anxiety, and with autonomy.

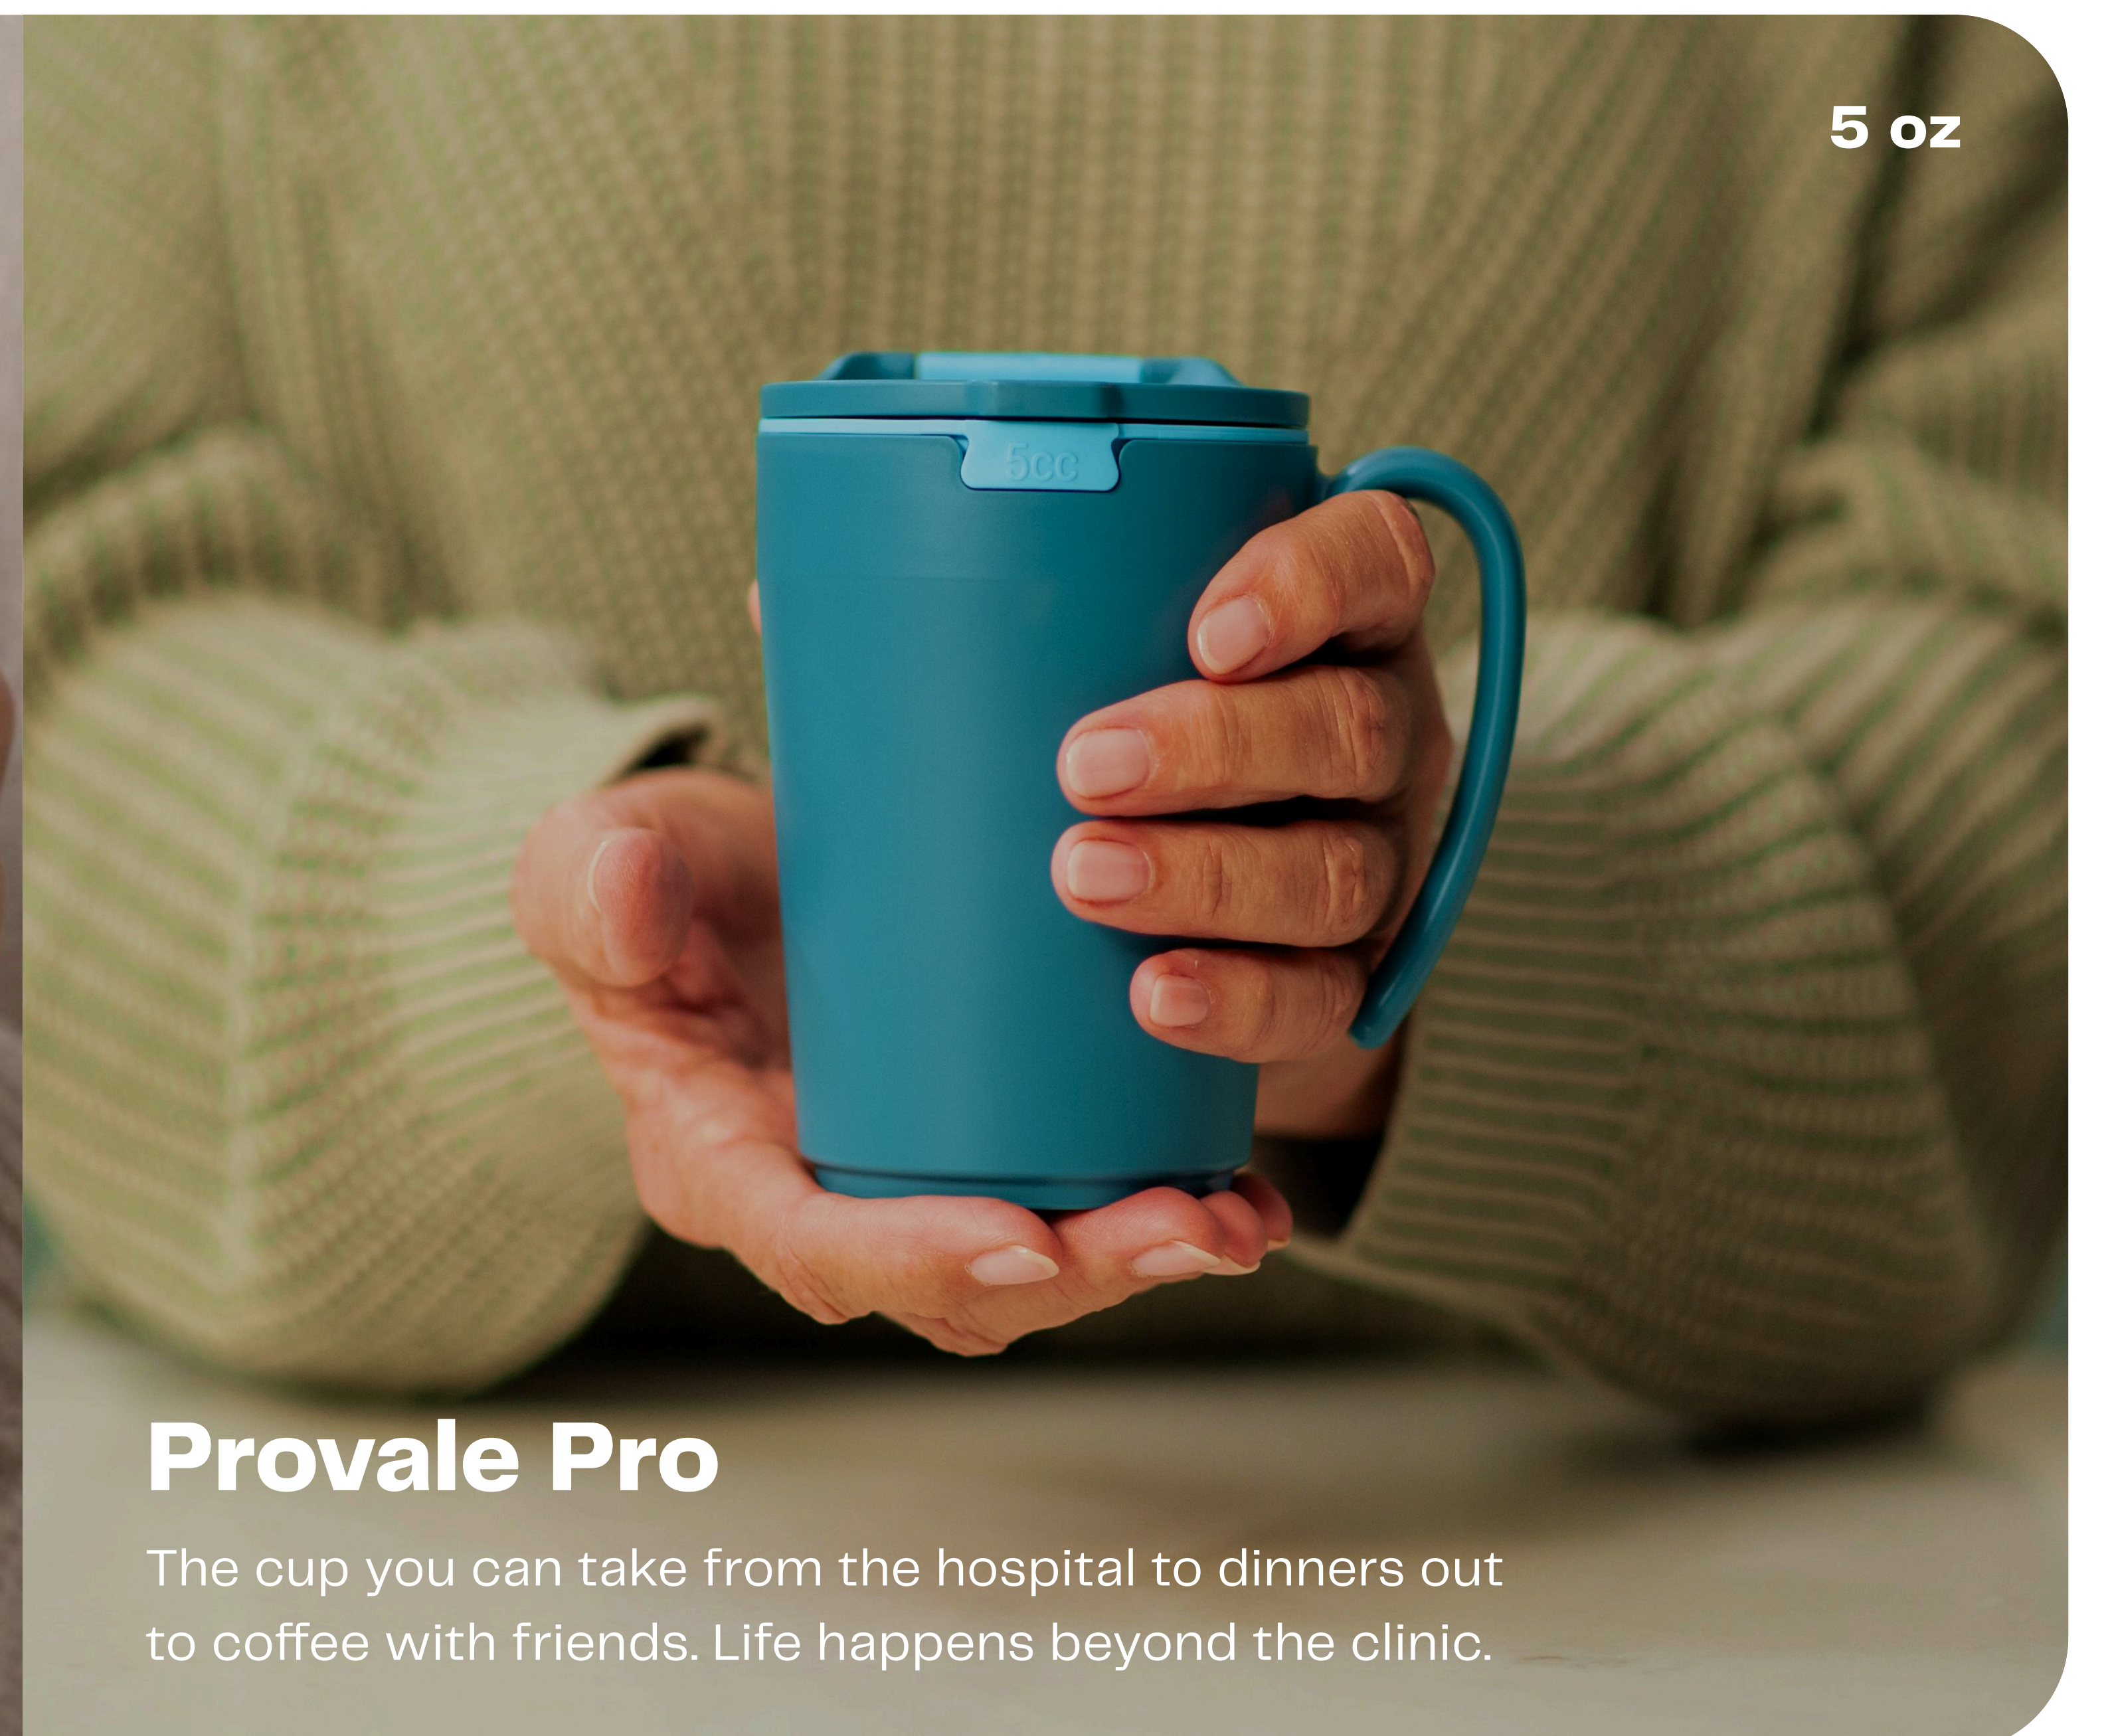

8oz

### Provale Classic

The original safe swallow cup speech therapists have recommended for years; the one they know and trust.

5 oz

### Provale Pro

The cup you can take from the hospital to dinners out to coffee with friends. Life happens beyond the clinic.

## Better Than Thickeners

The Provale Cup lets you drink thin liquids like water, coffee, and juice, that taste the way they're supposed to taste. No compromise. No miserable thickeners.

**Just safe, normal hydration.**

## Trusted By Clinicians

The Provale Cup delivers measured 5cc or 10cc sips with a controlled, anti-sucking flow to support safer swallowing. Lightweight and easy to hold for greater independence.

**Clinically trusted. Confidence in every sip.**

"I purchased the 5 cc cup for my husband and it's working so well. We use it for his tea and water. His dietician is very pleased that he is **able to drink 6 to 8 cups a day** using your cup. We've recommended it to others. Thank you for a very good product!"
